

Step Wise Instructions for user account creation

1. To create a new user account

1)Login to root user

```
$su root
```

```
$password: <Enter the root password here !!>
```

2)\$useradd -m -d /home/<username> -s /bin/bash -c "Enter your full name here" <username>

Note: username is the short form of your name for eg.. ravi and your full name is Ravikumar"

3)\$passwd <username>

```
$password: <Set a password for your account>
```

4)Type exit to come out of the root login

```
$exit
```

5)Now try to login to the system with your user name credentials

```
$su <username>
```

```
$password: <Enter the set password>
```

2. Make the new username as part of the "sudo" (admin) group

1)Login to the root user

```
$su root
```

```
$password: <Enter the root user password>
```

2)Enter the below command

```
$usermod -aG sudo <username>
```
